

GRADE 1 WORKSHOPS

Synchronous in-class or online!

Energy in our lives

FLYING HIGH!

In this workshop, students will explore natural energy through the design and build of a kite.

Materials Objects and Everyday Structures

HELPING THE HARVEST

In this workshop, students will explore different materials that have been provided to them. Students need to decide which materials are better for designing and building a harvesting container.

Daily and Seasonal Changes

WEATHER STATION

In this workshop, students will design and build a weather station so students can keep track of the changes in weather over time.
